PERSONAL PROFILE

I am an Agricultural Economist with a BSc in Agriculture Economics from Lilongwe University of Agriculture and Natural Resources (LUANAR) (completed December 2025, awaiting graduation in May-2026). I have a strong background in agricultural agronomic research, project implementation, and data-driven decision-making.

I began my career in agricultural research and extension officer, supporting field-level project delivery, before working with the National Statistics Office as an Enumerator and Field Supervisor on large-scale surveys. This experience strengthened my skills in survey design, digital data collection, field coordination, data quality assurance, and team supervision.

I am proficient in M&E, data collection and data analysis tools, including ODK, SurveyCTO, CSPro, Excel, STATA, R, SQL and Python, which I use for data entry, cleaning, analysis, and reporting to support indicator tracking, routine monitoring, and evidence-based decision-making. Currently am continuously developing my technical skills by learning new tools with focus in Linux environments, building cloud data pipelines, building machine learning models and generally learning how to automate tasks.

I am a self-motivated and adaptable individual, committed to improving program performance, accountability, and impact through effective use of data.

EDUCATION AND CERTIFICATION

• BSc in Agriculture Economics- LUANAR	Pending-Graduation(May 2026)
• Diploma in Agriculture – Mwimba College of Agriculture	2017
• Field Research Training- Institute of Public Opinion and Research(IPOR)	2023
• MSCE – Dowa Secondary School	2013

TECHNICAL SKILLS

Project implementation	Quantitative data analysis	Python, R, STATA, SPSS, SQL
M&E frameworks	Data collection and recording	ODK, Interviewer, Survey CTO
Risk assessment	Data visualization	Excel, Google Sheets, Tableau
Timeseries analysis and forecasting	GIS, Spatial analysis	Google maps, GeoPandas, QGIS

PROFESSIONAL EXPERIENCE

Enumerator – Poverty and Household Vulnerability (IHS)	National Statistics Office (NSO) Lilongwe Urban	25 th September – 22 nd December 2025
This survey is part of the Integrated Household Panel survey (IHS), that periodically assess vulnerability of a population to shocks. Determines how prevalence of random shocks affects poverty levels, food security and how households uses available endowments and entitlements to cushion themselves against shocks. Helps in designing interventions and policies designed to build resilient households.		
Team Supervisor - National Census of Agriculture (NACA)	National Statistics Office (NSO) Zomba	22 nd January 2025 – 22 February 2025
NACA maps changes in agriculture production. Both crops and animals and technology use. It assess developments in agriculture sector per defined time period. It accounts for national output and effectiveness of agriculture interventions aimed at improving productivity. And overall micro and macro outlook of Malawi agriculture sector.		
Enumerator – National Census of Agriculture Household Listing	National Statistics Office (NSO) Nkhotakota and Salima	12 August 2024 – 8 th November 2024
The listing excise happens before the main survey where enumerators accounts for all houses in a defined Enumeration Area (EA). Thus visiting every household in that EA, collecting information that is used to select participants of the main Agriculture survey.		
Enumerator – Unified Beneficiary Registry (UBR)	Zomba District Council -Zomba	15 th December 2022 – 11 th March 2023
UBR is a central record of households in Malawi and their economic, healthy, geographical position, education status, assets and other household characteristics which is used to harmonize targeting process for social protection programs. Example, Social cash transfer and Public works programs. Mainly to avoid duplicates and make the targeting process effective.		
Crop Agronomic Researcher and Agriculture Extension Officer	Farmer Service Unit (FSU)- AGORA	June 2018 – June 2022
- A farmer targeted project under Famers World. Worked as a frontier in implementing projects aimed at building farmers capacity, training and demonstrating on how to obtain maximum yields in Maize, Beans, Soya, Sweet Potato, Cowpeas, Groundnuts and rice. - Managed fertilizer research and trial plots aimed at identifying the best localized mixture of plant nutrients in the above mentioned crops - Facilitated opening of famers groups and village group saving and loan associations. - Organized and mobilized famers groups and local stakeholders for field trainings, field schools, field days, trade fairs and other agriculture related organizations. - Trained famers in financial literacy modules: Farming as a business, Book-keeping, Cash flow management, budgeting, climate smart agriculture, resilience from shocks and agriculture marketing. - The role also involved identifying famers eligible for agriculture loan inputs, risk assessment, collecting collateral, giving loan packages and ensuring farmers observe repayment schedule.
